

Math 7R
Mr. Friedman
efriedman@greatneck.k12.ny.us

Problem solving strategies are discussed and integrated throughout the school year. The curriculum reinforces the basic skills and extends knowledge to include concepts in algebra, geometry, probability, statistics, and measurement. Students are required to explain mathematical concepts as well as explain their reasoning orally and in writing. Both arithmetic and algebraic skills are taught at this level. Questions that model the state assessment exam are given throughout the school year to ensure that students are mastering the basic skills in mathematics.

- The 7th grade Math Assessment Exam will be given from May 1st – May 3rd, 2018.
- Test day for math for the 2017 – 2018 school year will be Thursday.
- Each week, your child will receive a weekly sheet that lists all assignments as well as upcoming tests and quizzes. They have been instructed to leave this in their HW section at all times for quick reference. In addition, you can view this information at <http://new.schoolnotes.com/xpages/view/218304>
